

Connecting to MeetUp

1. Connect USB cable to MeetUp and your computer.
2. Connect HDMI cable (from the HDMI port integrated in the table or below the TV) to your computer.
3. In your video conferencing software (Microsoft Team, Zoom, etc) make sure the microphone and camera source is set to 'Logitech MeetUp Device'
4. If the computer screen has not displayed on the TV, then change the source on the TV to the correct HDMI. The correct HDMI cable is 'HDMI 1'.

Using the remote
